

# Contour Shelf System for Corner Cabinets

Quality materials & construction

Grey anti-slip matting

Chrome railing

Smooth sliding action

\* right hand model shown

Available fitted with soft opening & closing pistons (optional)

# TRADECRAFT

Contour is a popular storage product for modern kitchens and a simple high quality “showpiece” solution for rectangular corner cabinets.

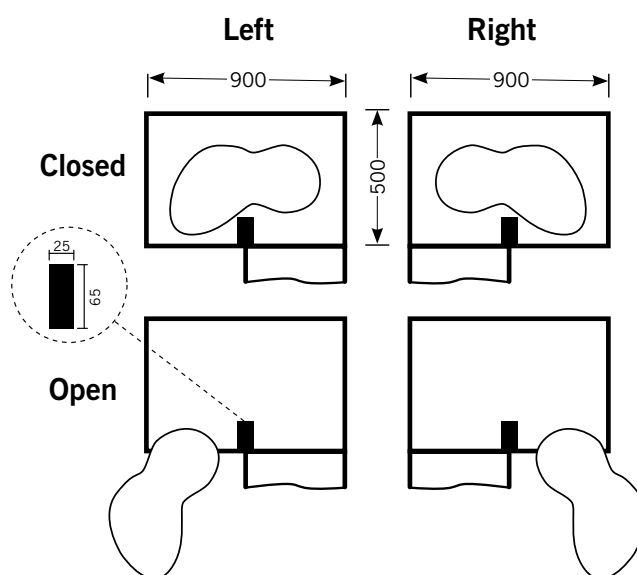

The kidney shape design allows it to move outwards and across whilst maximizing storage space.

To use, firstly open the door and pull out the shelf by the steel railing. The unit moves in two stages, outwards and then across to allow access to the rear of the unit.

Available separately is a piston kit, which when fitted self opens and closes the unit softly.

## Tradecraft Contour Unit

- Suits minimum cabinet size 900mm wide x 500mm depth.
- Left or right hand configurations.
- Two pull-out shelves with chrome railing and grey anti-slip matting.
- Shelves are mounted onto white arms which rotate around a steel pole.
- Shelves can be pulled out individually and are height adjustable.
- Easy to install.
- Smooth sliding motion.
- 15kg capacity per shelf.
- Quality materials and construction.
