

PRODUCT RELEASE - C

**Issue:** 049  
**Date:** 28<sup>th</sup> of February 2010

**Catalogue Section:** Meeting Table Bases  
**Product Manager:** Troy Searle

**Subject:** D-MODEL Folding Leg

Folded tables stacked

Thanks to overwhelming interest on the T-Model folding legs, we have introduced the curve shaped D-Model folding leg to complement our existing folding table base range.

The high performance BMB technology is on show in these folding leg ranges which are designed for quick installation, high stability and compact stacking in the folded state. The rigidity of the assembled legs is excellent. Very little movement or “racking” could be induced when these legs are assembled.

Our entire Model folding leg collection is folded by pressing the hinged strut and engaging the locking device when folded in or out. Once locked in, the legs are held securely in both the erect and folded position. The design of the mechanism effectively prevents the play of the locking fittings. The pivot mountings act as bumpers to separate stacks of folded tables and prevent damage to both the table tops and the leg sets.

The D-Model base is backed with a 2 year manufacturer’s warranty. All meet the standards required by offices, education, function and commercial settings.

### **Testing:**

A table kit was fitted with a 25mm thick chipboard top and was subjected to overturning tests to establish “recommended” maximum table top sizes. The overturning tests were based on guidelines shown in European Standard ENV 12521 and DIN EN 1730 and indicated that the maximum width top that can be safely used on these legs is 900mm. The maximum length of top is 2000mm.

**Note:** this recommendation is given for guidance only. The thickness and the density of table top material will affect the stability of finished tables.

It should be noted that if the legs are assembled closer together than 1330mm centre’s, overlapping of the legs will result in the folded position. The overlapping will not however affect stacking as the height of the pivots allows the overlapping legs to clear the next table in the stack.

### **Product Specifications:**

*D-Model*

CODE	Unit		Finish	Tops
	H	Base Span		
719.48816.340	710-715	594	 chrome	900 x 2000
719.48816.358*	710-715	594	 black	900 x 2000

**Tube Diameter:** 35mm diameter; 1.6mm thick  
**Material:** steel; PVC  
**Warranty:** 2 Year

Made in China

\*Not available in-store but may be ordered from supplier via your Artia showroom. Minimum quantities apply.

Indoor folding table leg. D shape curved base. Steel base and PVC mounting pivots. Folded by pressing the hinged strut and held securely in both positions.
