Subject: Resol Group – Dd Collection

Design at everyday prices

The Resol Group division specialises in the sectors of Hotel and Catering Trade. Their wide range of articles facilitates the creation of unique settings in hotels, restaurants, cafes and in areas destined for events such as banquets and conventions.

The characteristics which define the articles in the Resol collections are: design, quality, durability, functionality, visual appeal and competitiveness. Product quality, effective service and continued innovation are the main frames of their hotel and catering orientated activities.

**Resol
Group**

The Group's philosophy is "Design at everyday prices".

Resol designs and manufactures a broad range of plastic furniture. The company collaborates with a team of prestigious industrial designers who create attractive indoor and outdoor products, as well as products for the home and professional contract markets.

**Furniture
Design**

Dd Collection contains design furniture adaptable to indoor and outdoor settings. It offers chairs and tables in high quality high resistance plastic materials, functional office furniture, hotel and restaurant furniture that add a contemporary look to this type of installation. This is a comprehensive collection in which design is not incompatible with price.

Dd is a brand which is establishing itself as one of the heading figures in furniture design and is the Resol Group's bet for the future. Under the slogan "Design at everyday prices", Dd offers stylish furniture made from injection-moulded plastic at highly competitive prices. To make all this possible, Dd draws on the following strategic focuses:

- A creative team made up of cutting-edge designers who back their products
- Strong industrial operations integrating internal design, development and production processes for new products
- Use of a gas-assisted plastic moulding system during production process

Designers

**Joan
Gaspar**

**Josep
Llusçà**

**Lluís
Codina**

Contemporaneity, a not very strident design, all of it is pure transmission and, above all, simple, very simple.

The perfect chair exists. It is made of stainless steel and lightweight materials, such as plastic or aluminium. It is comfortable, stackable, economical, resistant and, furthermore, beautiful.

Upon posing a new design for a brand, I always think about its commitment with beauty, quality and innovation. I also think about its wish to make well-made products that surprise and captivate us.

Should you have any questions regarding any of the above, please do not hesitate to contact me.
