PRODUCT RELEASE - C

Issue: 008
Date: 15th of February 2010

Catalogue Section: Seating
Product Manager: Troy Searle

Subject: Pepper Timber Chair

We are pleased to announce the release of the Pepper timber chair. The Pepper chair is a medium duty item suitable for indoor café and restaurant style seating applications.

The Pepper chair has a preformed 11mm thick plywood shell with 10 No. laminations. The shell shape is considered to be stylish, ergonomically formed and because of its larger and stronger profile, provides a more supportive seating solution for most café, bistro and casual dining areas. The ply is smoothly sanded, stained when specified and finished with an abrasion resistant satin lacquer.

The Pepper chair frame assembly is a tubular steel frame that is polished and chromed. All construction features of the frame are considered to be satisfactory and because of its totally welded construction and widely spaced seat attachments, this frame is superior to other timber chairs out in the market.

The chairs are packed, 4 pieces per carton in K.D. form. Chrome plated attachment screws and washers are supplied and these screws also attach the stacking bumpers. An Allen key is provided with each chair to aid assembly and provide a DIY product.

The Pepper series chair is backed with a 12 month manufacturer's warranty and meets the standards required by hotels, cafés, restaurants and resorts.

Below are the product specifications of each item;

Product Image	Item Code	Description	Chair Dimensions
	795.10010.712	<ol style="list-style-type: none"> 1. Wood shell with PU coating 2. Shell Finish: Natural Maple 3. Welded Steel Frame: 16mm diameter x 1.5mm thick 4.
