

PRODUCT RELEASE - C

Issue: 009
Date: 23rd of March 2010

Catalogue Section: Seating
Product Manager: Troy Searle

Subject: Spectro Outdoor seating collection in Charcoal finish

We are pleased to announce the Spectro side chair to our outdoor seating collection in the Charcoal finish.

The Spectro is made from fibre-strengthened gas injected virgin polypropylene. A comfortable, elegant chair designed in Italy, it is proportionally designed, smoothly and perfectly finished, and the most ergonomic example of its kind. Weighting only 3.1kgs, the Spectro is stackable to 6 high and is absolutely resistant to shocks and severe indoor-outdoor ambient conditions.

The chairs have been tested to comply with certifications that pass European standards. These certifications relate to stability and overturning tests, general and mechanical safety requirements tests and for outdoor furniture seating that is used in public, domestic and contract use.

The Spectro series chair is backed with a 2 year manufacturer's warranty and meets the standards required by hotels, cafés, restaurants and resorts.
