

PRODUCT RELEASE - C

Issue: 005
Date: 8th February 2010

Catalogue Section: Castors & Glides
Product Manager: David Magnanini

Subject: Rotola & Formula Castor Ranges

We are pleased to announce new additions of OGTM castors, to add to our popular "Disky 2" range.

OGTM are high quality Italian design and manufactured castors suitable for a number of applications including filing cabinets, furniture, trolleys or tables. We have brought in two new ranges, the Rotola and the Formula series.

Rotola

The "Rotola" castor has a unique open style wheel that has no central axle as such. The wheel or tyre rotates on an open hoop that is part of the castor body. The overall appearance and manufacturing standard are considered to be excellent.

The castor body is a 2 piece zinc die casting. The body is robustly constructed and is well finish. The surface finish is a fine textured aluminium paint finish.

The tyre is a polyurethane plastic. It will be suitable for hard or soft flooring and is non-marking. It is available in grey or black.

A wheel brake is fitted to the castor which consists of an injection moulded plastic lever and a steel flat spring which contacts the castors tyre when actuated. The brake lever is coloured the same as the wheel. Operation of the brake is simple and effective. The Rotola is not manufactured without a brake.

We are stocking the 90mm diameter version with grey wheel with bolt fixing (M10 x 15mm), and the black wheel with 47mm square swivel plate fixing. Rotola castors have a 70kg load rating.

Formula 40 & 60

The Formula range is a wide profile twin wheel castor with two large wheels, giving it a distinct eye catching design. A robust yet striking design gives both strength and a visually impressive look.

As with the Rotola, the Formula is a zinc diecast body with a fine textured aluminium paint finish.

The tyre is a polyurethane plastic tyre. It will be suitable for hard or soft flooring and is non-marking. It is available in grey or black.

The 40mm version is available with black wheel only and 47mm square swivel plate fixing.

The 60mm version is available with black wheel with a large 62mm square swivel plate fixing, and grey wheel in bolt fixing (M10 x 15mm).

Both 40mm and 60mm castors are available with or without brake. Formula 40 have a load rating of 50kg and the Formula 60 is 80kg per castor.

Technical Information

These have been given thorough quality inspection to ensure goods are of high quality including impact and drop testing.

Both ranges have Catas testing certificates (available on request).
