Issue: 006
Date: 8th February 2010

Catalogue Section: Castors & Glides
Product Manager: David Magnanini

Subject: Sigma Castor Range

We are pleased to announce new additions to our castor range. The Sigma castor range consists of two 50mm Unhooded Castors, with Grey PU tread with Square Plate. Available with or without brake.

“Sigma” castors are a plastic bodied twin wheel castor with Grey polyurethane (PU) wheel tread. The PU wheel is a softer material than the usual plastic giving it better performance on hard floors, although it is still suitable for soft floors also. The appearance and manufacturing standard are of high quality.

The body is robustly constructed and is well finish. The surface finish is a fine textured aluminium paint finish.

Technical Information

These have been given thorough quality inspection to ensure goods are of high quality including impact and drop testing, and are rated to 50kg (dynamic).

Castors have a grey polyurethane tread, which is a soft wheel, ideally suited to hard floors, but also performs well on some softer surfaces.

Fitting is by square swivel plate. 38mm x 38mm x 2mm thick, with 25.4mm (1”) hole centres. The overall height is 60mm.
